QUITOBAQUITO PUPFISH

Save these rare fish!

How to help

- ◇ Locally: Volunteer at Quitobaquito Springs
- ◇ Globally: donate to the National Park Service

Why is it at risk?

- ◆ Changing temperatures(to much heat for them to survive)
- ◆ Erosion(the land is rising and falling ever so slightly, but enough to harm the fish)

DESCRIPTION, BEHAVIOR, HABITAT

- * It's a small fish, and it is native to only one place, Quitobaquito Springs, AZ
- * They like to live in swampy, marshy areas
- * It's very calm and unaggressive
