Save the Sawfish

Help Me!!!!

Why is it at risk?

- It is valued for its liver oil and food. They use the oil for medicines, soap, and leather tanning products.
- People kill them to stuff and put in their living room

Description , Behavior , Habitat

- The sawfish swing its saw from side to side impaling its prey
- They eat fish and crustaceans
- Sawfish can have 21 to 34 teeth on their bill
- They live in shallow coastal waters
- They like to lay over muddy and sandy bottoms

How you can help

- Stop killing them for decorations
- Stop using them for leather tanning products
